TV Channel Setup Services

We offer consultancy services on workflow and technology related aspects to upcoming TV channels including news channels, religious channels, entertainment & infotainment channels.

As the very foundations of journalism are being redefined, we offer technology which is ceaselessly shaping the future of news consumption with every new innovation. The rise of digital media has completely changed the concept of journalism as a large number of users consider digital and social media to be their primary source of news and information. We offer solutions for digital media from training web-journalists to setting up a digital studio in newsroom for superlative quality of news videos. We have helped several media houses across countries enhance their video capabilities by setting up VR studios; identifying fresh talent; organizing training workshops for journalists and by providing audience engagement strategy and metrics.

Smart Hospital Management System

Complete Desktop and Web based Hospital Management System for Health Care / Hospitals

+ Patient Mobile App

Alpha Smart Hospital Management System (ASHMS) is Modern and Complete Hospital Automation Software that suites to almost every hospital or medical institution from patient OPD visits to Operation to Pathology Test etc. It includes 25+ modules with 8 inbuilt users (Super Admin, Admin, Doctor, Accountant, Pathologist, Radiologist, Receptionist and Patient) panel.

The advertisement graphic features a dark blue background with a white and light blue hexagonal pattern. At the top left is the logo for Alpha Smart Hospital Management System, which includes a stylized 'A' and the text 'ALPHATECH SMART HOSPITAL SYSTEM'. To the right of the logo is a smiling female doctor in a white lab coat holding a clipboard. Below the logo is the text 'Alpha Smart Hospital Management System' in yellow and white, with a white ECG line underneath. The central part of the graphic shows three hexagonal frames: the top one shows a doctor at a computer workstation, the middle one shows hands interacting with a tablet displaying medical scans, and the bottom one shows a surgical team in an operating room. At the bottom left, there is a tablet and a smartphone displaying the system's interface. At the bottom right, there is a list of features and a blue caduceus symbol.

0312-9727031

www.Alphatech.pk

What Are We Introducing

Double Unit Conversion rate

Different units for purchase and sale

You may purchase in packet and sale in piece like: you purchase 1 packet of soap and that packet contains 6 pieces of soap and you sale soap in piece. Now you can do this in Off POS. You can also check the stock in both two units.

Selling in Quantity and Amount Both

You may not always sell in only quantity/piece, for some item you may need to sell in amount. Well, Off POS supports it.

Any Type of Tax and Indian GST Supported

Whatever your tax title is: VAT, IVAT, Tax, GST, HST etc all are supported
Multiple tax in one item is supported
No tax is also supported
And Indian GST with it's CGST, SGST, IGST and VAT is also supported
CGST and SGST for inter state customers
CGST and IGST for outer state customers
VAT for Alcoholic Items

Service Selling Facility

Sell services as well as products like in a Computer Shop/ Electrical/Electronic/Plumbing Shop.
Running a retail shop with service center where you have services that does not have stock?
Now you can manage both products and services here.

What Are We Introducing

Usual Sale Quantity/Amount

- 12 pcs
- 5 pcs
- 250 g
- 6 pcs
- 2 Kg

You know for several items customers do not ask for 1 piece. Customer usually buys 12 eggs at a time, 5 pieces of toilet tissues, 250g of green pepper, 2 Kg of rice, 6 pieces of white board marker etc. There are lots of items like these. So you will just set what is the amount/quantity of that item's usual sale, later when you click on that item in POS to add to cart, that Quantity/Amount will be auto set. No need to click on plus icon for 12 times. You can also change the Quantity/Amount to any as well.

Attendance Tracking

99% Retail shop has some employees/sales persons or others. And a business owner must need to track their attendance. No worry, Off POS is providing that facility.

Damage Tracking

In reality, damage happens in shop, and that must be considered in profit/loss. And when you track damages, you can decide how to control that to reduce loss. In Off POS you can track your damages with auto calculated loss for that damage. This feature is essential for a shop.

Small CRM

Date of Birth and Date of Anniversary Field in Customer Profile, SMS to Customers Who Have Birthday Today, SMS to Customers Who Have Anniversary Today, Send Custom SMS to Customers, SMS Invoice etc
